Salsgiver, Inc. network upgrades allow Internet speeds up to 100 Mb/s

Freeport, PA, January 20, 2010 — Salsgiver, Inc. has just completed network upgrades which will allow Internet speeds up to 100 Mb/s symmetrical.

“We’re very excited about the increased speeds we can now offer to the customers in our fiber optic network”, stated Loren Salsgiver, CEO, Salsgiver, Inc. “Salsgiver has the flexibility of providing extremely fast Internet speeds and additional services that would not be possible over anything other than fiber optics”, Mr. Salsgiver added.

One of the biggest areas of growth in the Telecom industry is VoIP phone services. Salsgiver VoIP customers often realize significant savings after switching from traditional telephone company phone services. With their increased bandwidth options, Salsgiver can now give small, medium and large businesses the capability of handling all their telephone calls in addition to much faster Internet download and upload speeds.

About Salsgiver, Inc.

Salsgiver, Inc. was founded in 1995 as an Internet Service Provider. In addition to providing Phone and Internet services, Salsgiver also specializes in dark or lit optical fiber construction and data center services such as server colocation and disaster recovery.
